- Image Control
- File Upload Control
- Panel Control
- Drop Down List Controls
- List Box Control
- Check Box List
- Radio Button List
- Enquired Field
- Validator Control
- Compare Validator Control
- Range Validator Control
- Regular Expression
- Validator Control
- Custom Validator Control
- Grid View Control
- Details View Control
- Data List Control
- Master Pages State Management Using Themes
- Master Page File
- Child Page Theme File
- Client-side State Management and Server Side State Management
- Token Generation
- Authentication with Token
- Authorization with Token

Module 3 [Interaction Blazor]

- Ajax
- Ajax Server Controls
- J-query Control
- Timer Control
- Ajax Tool Kit Control
- JavaScript
- Use of Java script
- Java script Methods
- Java script Pop Ups
- Java script Functions
- Java script Event
- On After Render Lifecycle
- After Render Lifecycle
- On Initialized Life Cycle
- On After Render Lifecycle
- PROJECT & Configuration
- Page rendering
- On Init
- Local Storage
- Session Storage

Module 4 [Database Connectivity]

- DB First Approach (Database)
- Code first approach

Module 5 [Applicability to Industry]

- Configuring ASP.Net core for Debugging
- Application Exception Handling
- Trouble shooting and Debugging Page
- Defining Custom error
- Configuring Error Specific Error Pages
- Stream Rendering Example
- Blazor WASM Standalone vs Blazor Web App
- Make Data Permanent in Navigation
- Reference Type
- Profile Page
- C#
- Chart Control
- Chart Type
- Chart Legend and Title
- Sorting Chart Filtering Chart
- Chart Appearance 3DCharting Value Types
- Declaring value type object
- User Defined Data Types
- Enumerations
- Multithreading
- Serialization
- Remoting

- I/O
- Console I/O
- Reading and writing Binary Data
- Random Access File+
- Data reader
- Data View
- Data Relation Schema
- Constraints SQL Server
- Creating And Managing Databases SQL Statement
- Composite Data-Bound Control
- Working with Data-Bound Web Server
